Capital Improvement Plan

FY 2024-2025

Project Title:	2	30 kV	/ Interconnection		Munis Project Code:			#47			
Section I: Description				District Nos:	4	Project Length		12/31/2029	Priority		High
Lodi's 230/60kV Substation Project consists of two 230/60kV transformers along with site improvements, facilities and equipment required for the interconnection to PG&E's new 230kV switching station and to Lodi's existing 60/12kV Industrial Substation. The project also includes modifications to Industrial Substation and 230kV additions to PG&E's switching station to complete the interconnection. The new substation will be located on undeveloped land adjacent to Industrial Substation with space allocated for the addition of a third transformer.											
Justification/factor driving project This project will provide additional transmission interconnection capacity to serve Lodi's future load growth and will reduce transmission access charges by eliminating low voltage transmission charges paid by the utility each year. Once in service, the utility will reduce its low voltage transmission costs - the savings of which will be used to pay the annual debt service associated with the financing of this project.											
Additional Information FY 25 includes deposit payment on transformer purchase due to long lead time. FY 25 MY reduction due to delay with preparation of bid docs. Updated schedule and costs to be re-evaluated during FY 26 budget. Section II: Estimated Project Costs
